Subject: ICH AgChem

Anna and Rick,

I wanted to follow up with you on the possibility of meeting with Nancy and Mike regarding their support in pushing the ICHAgChem. If that is to happen they will have to support your office in working with your international government regulatory partners. Syngenta has scheduled a meeting on December 6th in the late morning (11-12) on one of our AIs which I will be attending. I am also trying to schedule a meeting through CLA on the Developmental Thyroid study with Anna and colleagues on the 5th or 6th for our 2-3 hour problem formulation discussion.

Let me know if it would be possible sometime over those two days to find a time to lay out the ICHAgChem. I would think 30 minutes would do it. If you think it is appropriate we could expand the discussion to some thoughts on improving the ESA process in which case 45 minutes to do both would be good.

Thanks
doug
